Arizona Evolution

Following on from the Arizona range of high performance steel shell boilers the **Arizona Evolution** has been developed to meet the needs of the 21st Century.

The Arizona Evolution boilers are a range of one-piece steel shell forced draught high efficiency boilers. Specifically developed for the public and commercial sectors. Compact dimensions mean that it can be easily and quickly installed.

Outstanding performance is achieved using reverse flame combustion chamber technology. Due to their continual re-entry into the flame zone, total combustion of the fuel particle is achieved. Gas or Oil options are available and controlled by a single control panel ensuring optimum performance is maintained.

- One piece steel
- Fully matched Oil & Gas burners
- Fully integrated control system
- Chequered plate top
- Insulated casing panels
- Lifting eyes for ease of positioning

Spares

Potterton Commercial spares are available nationwide through the interpart network of approved stockists. Alternatively please contact:-

Interpart

Brooks House
Coventry Road
Warwick CV34 4LL
Tel: 0844 871 1540

Applications & Installations

Our experienced technical support team are available to offer advice on any aspect of heating system design and boiler installation.

Please contact: 0845 070 1057

Commercial service offices

Our service organisation covers the whole of the UK to look after your needs for all Potterton Commercial products.

Our service office offers a wide range of specialised services including:

- Burner commissioning for all fuels
- Boiler service contracts
- Breakdown and repair services
- Burner and boiler replacement
- Oil/gas conversions
- Water treatment and descaling
- Packaged units

All descriptions and illustrations contained within this leaflet have been carefully prepared, but we reserve the right to make changes and improvements in our products which may affect the accuracy of the information in this leaflet.
